H-350	S-200		SP-100	Stop Pin
H-550	S-300		SB-100	Spooling block
H-700			WK 70/90	Wire clamp
(H-1000)				

SAFETY FIRST!

Operational Advantages

- A. Grips and locks wire & chains without any other interaction
- B. Rotates the chain links automatically - carrying out safe locking
- C. No extra "locking device" (locking bolt)!
- D. No extra "positioning device"!
- E. The "easy positioning" makes it fast and easy to operate
- F. Large grip area; positions wire & chains - without using winches
- G. "Quick Release" is done in less then 2 seconds!
- H. Can be operated even with "dead ship condition"
- I. Prevents damage to buoys and other deck equipment
- J. Special inserts for fiber ropes

THE ONE AND ONLY!

In accordance to The Norwegian Maritime Directorate (NMD)

“... Emergency release on chain and wire stoppers, shall be performed automatically from the bridge - without any manual interference on the stoppers”. NMD § 48 (2003).

Triplex Shark Jaws and Guiding Pins are designed in accordance to NMD regulations, are type approved by both ABS & DNV and has **NO EXTRA LOCKING BOLT!**
